DETAILED ACTION

Response to Amendment

1. Applicant's amendments, filed 9/14/2006, have been fully considered and reviewed by the examiner. The examiner notes the amendment to claim 2 to incorporate the subject matter of claim 1 and the subsequent cancellation of claim 1. Claims 2-17 are pending in the instant application and Claims 11-17 remain withdrawn due to a restriction requirement.

Response to Arguments

2. Applicant's arguments filed 9/14/2006 have been fully considered but they are not persuasive.

The applicants argue against the Keller reference stating that the reference teaches magnets are imbedding in the confinement rings and are therefore not placed on opposite sides of the confinement rings. The examiner does not agree with such an assertion. The examiner notes the claim as written ("at least one") only requires a single confinement ring and not the argued "rings." Additionally, the examiner notes, the arrangement of Keller reads on the claimed apparatus. Confinement ring (30) is provided with magnetic rings (26 and 32) on opposite sides, wherein each of the magnetic rings comprise the different diameters as shown in Figure 4. Additionally, confinement ring is placed within the chamber, see column 4, lines 4-13, and therefore defines the plasma volume.

The applicants arguments with respect to the confinement rings being a mechanical device, however, as discussed above, the rings as taught by Keller may be placed inside the chamber and therefore would mechanically ("physically") define the plasma area.

The applicant argues that there are no confinement rings to have a magnetic field passing through. This is not found persuasive for the reasons set forth above, because the rings 26, 30, and 32 are placed inside the chamber. Therefore, ring 30 reads on the claimed confinement ring and would necessarily have a magnetic field would pass there through.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Keller et al. (US 6,051,151).

These claims are rejected for the same reasons as the office action dated 6/29/2006 and for the reasons set forth in section 2 above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1762

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keller et al. (US 6,051,151), as applied to claim 2 above, and further in view of Lenz (US 6,019,060).

These claims are rejected for the same reasons as the office action dated 6/29/2006 and for the reasons set forth in section 2 above.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
